# Twin Transillumination by National A Sensational Innovation

**National Twin-Transilluminator \$12<sup>50</sup>**

By Dr. LOUIS H. SCHWARTZ (Patent Applied For)

## Simultaneous Transillumination of BOTH Sinuses

- ◆ The only instrument that permits transillumination and comparison of both sinuses at the same time.
- ◆ When used with the glass sheath, in the mouth, remarkable transillumination results, because of the combined penetration of two lamps, instead of the usual single bulb.
- ◆ Employs standard flashlight lamps; no costly "special" bulbs.
- ◆ No electrical parts to sterilize: the glass sheath and the bulb hoods are removable for sterilization.

- ◆ Furnished complete with push-button switch and 7½ ft. cord, with cord tips that fit all standard transformer connecting posts.
- ◆ Excellent for sinus, antrum mastoid, breast and hydrocele diagnosis.

**INDISPENSABLE**  
for  
accurate  
diagnostic comparison

**A DEFINITE ADVANCEMENT  
IN TRANSILLUMINATION  
UNIQUE — PRACTICAL**

**N80 TWIN-TRANSILLUMINATOR**  
complete with spare bulbs, bulb hoods,  
glass sheath, push-button switch and 7½ ft.  
cord.....**\$12.50**
